Stress Hormones

Stress hormones such as cortisol are produced and regulated by the adrenal glands. They are created to help the body to deal with stressful situations by increasing the heart rate and the force of contraction and blood flow to the heart, liver, skeletal and adipose tissue. They also dilate airways to the lungs and increase blood levels of glucose and fatty acids.

Stress hormones and their effects are linked to virtually every body system. Thus, many physiological processes and bodily functions, including cardiovascular health, sex drive, pH balance, skin conditions, energy levels, mood and overall psychological outlook often correlate to adrenal gland function.

Quantum-Rx Adrenal Complex is specially formulated to nourish the adrenal glands and to promote optimal adrenal health during times of stress, by combining the most bio-available and biological-terrain-friendly forms of vital adrenal nutrients.

What Is Quantum-Rx Adrenal Complex?

Quantum-Rx Adrenal Complex is the next generation of cordyceps. It contains:

- The fermented mycelial extract of cordyceps delivering a whopping 15% andenosin, which is up to *100 times more potent* than other extracts selling for more. The fermented mycelial extract delivers the rich array of triterpenes liberated only through this precision temperature, world class fermentation process. You could never get these compounds by simply eating the mushrooms, since they are buried deep in the fiber.
- Raw cordyceps mushroom concentrate, which delivers the vast array of water-soluble alkaloids.
- The latest Chinese research has demonstrated that the combination of the raw and fermented cordyceps is faster acting and far more potent than the sum of their individual benefits, even when twice as much is used.
- Synergists and co-factors: After months of research, using the latest cellular resonance technology, we have identified the ideal synergists to be used with cordyceps in order to deliver maximum effectiveness.

Synergistic Products

- 1) **Q. Tomato Concentrate** — The perfect potassium delivery
- 2) **Q. Vitamin C Complex** — Proven, natural-source vitamin C complex
- 3) **Max Stress B Nano-Plex™** — High energy, essential B complex vitamins for additional adrenal support*
- 4) **Amla Royale™** — Broad-spectrum hormone support*

The following breakthrough, newly discovered co-factors and cellular synergists are present in **Quantum-Rx Adrenal Complex**: Central American Nopal Cactus, South American Burdock Root, South American Dandelion Root, Szechuan Lovage, South American Skullcap Root, North American Bladderwrack, Indian Guggul, Asian Arabinogalactan, and solvent-free Carbon-matrix Humate (*humic and fulvic acids*).
